

**Why rebuild every  
technology from scratch  
when Stone Pillar and  
TestChipBuilder can make  
revising test structures a  
breeze?**

# Stone Pillar test chip layout services exploit TestChipBuilder software to automate parametric device layout

- Industrially proven in hundreds of designs and dozens of tapeouts
- Dramatically speeds test chip layout
- Automatically creates structure variations
- Last minute updates or complete revisions are as simple as editing a spreadsheet
- Automatically generates self-consistent documentation

# When you work with Stone Pillar for test chip layout services

- We guarantee competitive pricing up front
- We work with you to make sure it's done right
- TestChipBuilder facilitates easy updates in response to last minute geometry changes
- The cost and effort for revisions is dramatically reduced
