Stone Pillar Demonstrates Latest Capabilities at BCTM 2008

New release of Stone Pillar Suite includes capabilities for on-the-fly configuration of fully automated test generation and support for complete, self-consistent design rule generation and documentation

SANTA CLARA, California, September 30, 2008 – Stone Pillar Technologies Inc. will be presenting detailed demonstrations and technology briefings on the latest enhancements to their Stone Pillar Suite, a software tool suite supporting process technology development from test chip generation through process monitoring as part of the BCTM conference in Monterey California. The conference, which runs from October 13 through October 16, 2008 at the Portola Plaza Hotel in Monterey California, will feature exhibitions at which Stone Pillar will be providing demonstrations on October 13 and 14.

Software tools within Stone Pillar Suite automate the complex tasks involved in creating a test chip, testing devices, managing process experiments, analyzing data, and generating reports. These tools help technology developers and process integration teams through increased efficiency and help gain valuable insight into technology issues from early-stage development through yield improvement. Floating licenses for Stone Pillar Suite are available now as either term licenses or perpetual licenses, for either single geographic locations or worldwide floating licenses.

About Stone Pillar

Stone Pillar Technologies, Inc. is the leading provider of data management systems for semiconductor process technology development. Stone Pillar Suite enables semiconductor manufacturing and design engineers to gain valuable insight into design-for-manufacturability issues from early-stage technology development through yield improvement.

Products within Stone Pillar Suite automate and optimize tasks such as design rule creation and documentation; test chip development, documentation, and revision; test plan creation; and complete data management, analysis, and report generation. By facilitating detailed data analyses, Stone Pillar Suite reduces engineering costs and capital expenses and speeds the development of new process technologies.

Stone Pillar software is in use by leading semiconductor vendors and at leading research institutions worldwide.
