Stone Pillar Demonstrates Latest Test Automation Capabilities at ICMTS 2012

Latest capabilities include enhanced bench test automation with flexible test equipment library

SANTA CLARA, California, March 6, 2012 – Stone Pillar Technologies Inc. will be presenting detailed demonstrations and technology briefings on the latest enhancements to their Stone Pillar Suite, a software tool suite supporting process technology development via parametric test chip generation, test automation, and data analysis as part of the ICMTS conference in San Diego, California (<http://icmts2012.pdf.com/>). The conference, which runs from March 19 through March 22, 2012 at the Portola Plaza Hotel in Monterey California, will feature test equipment exhibitions in addition to the technical program. Stone Pillar will be providing demonstrations on March 19, 20, and 21.

Software tools within Stone Pillar Suite automate the complex tasks involved in creating parametric test chips, testing the devices, and managing and analyzing the resulting data. Stone Pillar tools help technology developers and process integration teams through increased efficiency and provide valuable insight into technology issues from early-stage development through yield improvement.

Stone Pillar's TestPlanManager and BenchTestManager streamline test automation by connecting test equipment with details of device locations and parameters, turning testing into a simple drag and drop operation.

Floating licenses for Stone Pillar Suite are available as either term licenses or perpetual licenses.

About Stone Pillar

Stone Pillar Technologies, Inc. is the leading provider of test plan automation for semiconductor process technology development. Products within Stone Pillar Suite automate and optimize tasks such as parametric test chip development, test plan creation, and data analysis.

Stone Pillar software is in use by leading semiconductor vendors and at leading research institutions worldwide.

For more details, visit www.stonepillar.com or contact Stone Pillar at 408-748-1105 or info@stonepillar.com.
